

Investing for Success

Snapshot report

Under the Investing for Success Agreement for 2017
Wyreema State School received

\$34, 935

Our school initiatives are on track to meet or exceed our targets

During 2017, we focused on maximising the benefits of this funding for our students. After reviewing our 2017 *Investing for Success* agreement, it is clear that we are on track to meet or exceed our targeted student outcomes. We continue to implement our initiatives to ensure that every student succeeds.

Initiatives implemented include:

Initiative 1

- Targeted and explicit instruction to further improve small groups of students near to or in the Upper 2 Bands, primarily in Literacy – Reading through:
 1. Continued implementation of consistent Multi-Lit programs (includes Mini-Lit, Pre-Lit and Reading Tutor) as intervention for Reading.
 2. Providing targeted (small group and individual) explicit Literacy and Numeracy instruction aimed at improving student outcomes through differentiation as determined through data analysis.
 3. Continued deep analysis of short, mid-term and long term data including NAPLAN and other Whole School Assessment to enable teachers to target areas for explicit teaching - for the whole class, small groups and individuals.
 4. Increased development of staff capability and understanding in pedagogical practices and teachers' repertoires of effective strategies in the teaching and learning cycle as well as generally increasing our overall capability to initiate and implement innovative practices.

Initiative 2

- Embedding Positive Behaviour Learning (Phase 1) into our school culture as a positive and consistent behaviour modification and expectation program for all students.

Our school initiatives are showing substantial progress toward our targets

Investing for Success

After reviewing our 2017 *Investing for Success* agreement, it is clear that we have made progress toward our targeted student outcomes in the following area. We will continue to focus on maximising the benefits of this funding for our students, and adjust our initiatives as needed to ensure every student succeeds.

- Enabling productive implementation of STEM learning areas and using STEM to increase student engagement in other Key Learning Areas. Also, building teacher capability to use technology to cater for differentiation and improve learning.
